AUTOL Premium Facade Paint

Self Cleaning Effect Silicon Paint

AUTOL is a premium silicon paint that keeps buildings cleaner for longer, the revolutionary dirt particle removal action that occurs once the Autol has been applied ensures long term protection from dust, dirt, algae, bacteria and fungal growth.

Autol creates a surface structure so that the water droplets cannot maintain surface contact. Once this occurs the dirt particles are no longer left upon the surface but carried away with the water droplets.

Technical Information

Autol is available in a wide range of colours from the classic and finesse colours, and is supplied in 12.5 litre and 5 litre tubs. Coverage is 0.17 litres per sq m² on smooth surfaces and 0.40 litres per sq m² on textured surface.

Autol is highly breathable and easily applied by brush, roller or spray.
