

The all-purpose mortar...

**SM700<sup>®</sup>**

Very easy to work with,  
either by hand or with a machine.  
The quality Marmorit product  
from the beginning.

**SM700. The all-purpose mortar.  
For more than 20 years.**

# SM700<sup>®</sup>

The ultimate  
multi-function mortar

**SM 700 The super high-quality product.**

With a large range of possible applications, this product was developed with keen sense of product interaction and attention to detail.

Subtleties, such as special textile fibres and an especially remarkable formula, characterize this amazing mortar.

**SM 700. The all-purpose mortar.**

Special mortars for each individual job are no longer needed. SM 700 is the all-purpose mortar.

Covering concrete forms. Repairing and reworking plaster render damage and cracks.

Rubbed down surfaces, for instance in the preservation of historical monuments. During difficult overhead work and in the tightest areas – count on SM 700. For a crack free solution use SM 700.

SM 700

**SM 700. The adhesive mortar.**

Used for all MARMORIT WARM-WALL External Wall Insulation Systems, both polystyrene and mineral fibre.

**SM 700. The reinforcement mortar.**

Two days after the insulating wall panels are glued in place the reinforcing fabric can be embedded.

**SM 700. The renovation mortar.**

With SM 700 the old render no longer has to be completely removed. If the old layer is still holding well, it only needs to be thoroughly cleaned, prepared and then coated with SM 700. It saves time for the craftsman and saves the building owner from having a lot of dirt.

**SM 700. The crack repairer mortar.**

For the restoration of cracked render and façades. Even in the most tricky places SM 700 keeps what it promises.

QUALITY FACADE SYSTEMS AND FINISHES

# SM700®

Crack free,  
everything works well with SM 700.  
A super high-quality product.  
Uncompromising.  
Successful and  
risk-free application.
